MilchMobil PRO

Precise. Intuitive. Modern.

FÖRSTER TECHNIK®

EACH CALF COUNTS.

Mobile Calf Feeding at the Highest Level

Precise Feeding That Just Works.

When your calf feeding system runs smoothly, your entire daily routine in the barn becomes easier. The MilchMobil PRO helps you organize feeding more efficiently, streamline processes, and ensure that high standards of hygiene and quality are consistently met. Depending on the configuration, it handles key steps such as mixing, heating, pasteurizing, and cooling the feed. Thanks to its electric drive, the milk can then be conveniently transported to the calf barn and dispensed with precision.

The system offers a decisive advantage, especially on farms with automatic milking systems: milk produced throughout the day can be cooled immediately and kept fresh for later feeding. This makes the MilchMobil PRO a solution that not only provides functionality but also takes the entire feeding process to a new level.

The right model for every farm: Depending on the model, the MilchMobil PRO is available in a push or pull version, as well as with different tank sizes.

300 Liter

Smart Features for Better

Color Display – Everything at a Glance

- 4.3-inch high-resolution color display with backlit keypad
- Vibrant, colorful icons just like on a smartphone
- Clear and intuitive operation
- Saves time and reduces operating errors

Water Bath – Fast Heating and Effective Cooling

- Fast and gentle heating of the milk
- Powerful 8-kW heater for short heating times
- Even heat transfer protects the milk from localized overheating and helps maintain consistent quality
- Effective and rapid cooling of fresh milk

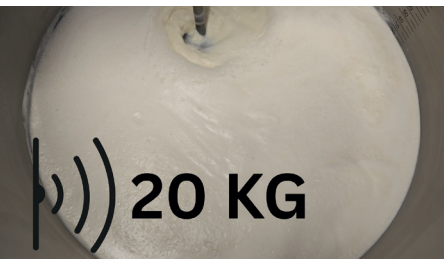

AMS-Cool – Always Fresh and Cool

- Integrated cooling floor for reliable milk cooling starting with the very first milking
- Cooling with cold tap water or via a refrigeration unit
- Automatic control directly through the MilchMobil PRO
- Ideal for robotic milking operations with a continuous flow of fresh milk
- Maintains milk hygiene and quality without additional effort

Mixer and Agitator – Thoroughly Mixed

- Individually adjustable speeds for mixers and agitators
- Reliable mixing and agitation even while driving
- Keeps fresh milk and acidified milk in constant, even motion
- Prevents added ingredients from settling
- Ensures that calves receive well-mixed feed

Level Sensor – Monitoring the Tank Level

- Keep an eye on the tank level at all times via the display
- No need to read the liter scale on the tank
- Provides greater safety during the preparation and execution of feeding

Performance in the Barn*

Pulling or Pushing - Flexible in Everyday Barn Life

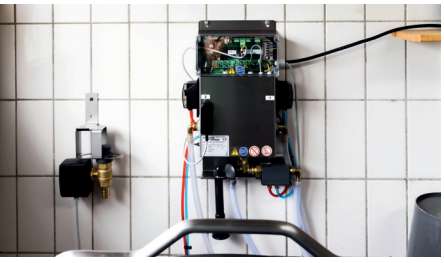

- Can be used either by pulling or pushing
- For easy maneuvering, even in tight spaces
- Adapts to individual work styles and ergonomic requirements
- Flexible use in various barn environments

Cleaning and Hygiene

Automatic Cleaning

- Automatic circulation cleaning of the tank and all milk-contact parts
- Thorough cleaning via a rotating cleaning nozzle
- Automatic control of the cleaning temperature
- Ensures reliable hygiene and reduces the burden of daily cleaning

Fully Automatic Cleaning

- Automatically cleans, fills, and heats
- Saves a noticeable amount of time before MAT feeding
- To get started, simply dock the MilchMobil PRO to the Clean & Fill Station
- Is fully prepared for the next feeding
- Reduces manual labor and streamlines daily farm operations

CalfPlan – Feed Each Animal According to a Plan

- Feeding tailored to individual animals and their age
- No RFID transponders or antenna technology required
- Easy identification via numbered calf huts/pens
- Suitable for individual and group housing
- Appropriate water intake according to individual feeding plans
- Supports growth, ruminant development, animal welfare, and performance

Pasteurisation – Gentle and safe

- Fast and effective pasteurization, even for small quantities of milk
- Rapid cooling via a cooling floor and cooling jacket
- Supports the preparation of milk that is safe for calves

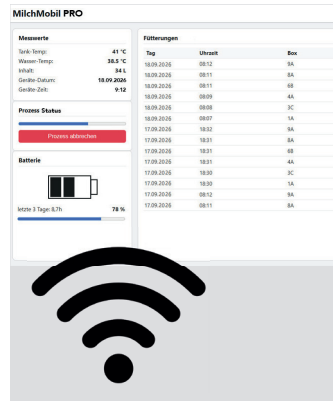

Optional Equipment

For Even More Comfort

Comfort and Hygiene Package

- Direct operation via the dispensing button on the dispensing gun
- Greater ease of use and fewer steps
- Rotating cleaning nozzle for thorough cleaning of the tank
- Supports clean and hygienic operations in daily use

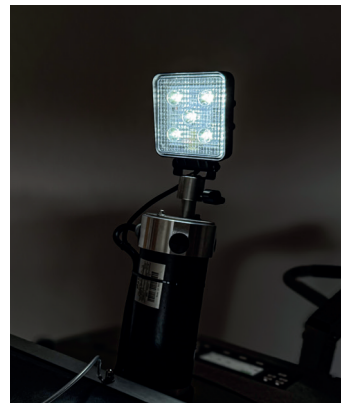

Internet Connection

- Connection to CalfCloud via Wi-Fi
- Greater remote control
- Receive real-time updates via status and error messages, as well as online software updates
- Complete feeding history and centralized feeding plans

Puncture-resistant Tires

- Tires with a foam-filled core
- Puncture-resistant, exceptionally durable, and designed for easy service
- Reliable performance on any terrain

LED Headlights

- Optimal lighting for the walkway and calf pens
- 360° rotatable LED floodlight
- Easy and flexible tilt adjustment
- Safe working conditions even in low-light conditions

Swivel Arm

- Height-adjustable swivel arm
- Flexible positioning of the dispensing gun
- Secure locking in the desired position
- Ergonomic and comfortable operation

Foldable Jug Holder

- Holds up to two milk cans or bottle buckets
- Easy and safe transport
- Folds up to save space when not in use
- Flexible and compact for everyday use

Drench Adapter for Cows

- Safe and Targeted Drenching of Cows
- Easy to use thanks to direct connection to a drenching harness and the MilchMobil PRO
- Supports rapid fluid ad-ministration

Fly-proof Lid

- Protects milk from flies and contamination
- Promotes a hygienic feeding process
- Easy to put on and take off

Configure the right model for every business

Your Custom MilchMobil PRO

- Configure the MilchMobil PRO quickly and easily to suit your needs
- Conveniently select the model and features on your computer
- 3D view from all angles
- Export the complete list of specifications as a PDF
